NORTHSTAR UNIVERSITY

University Information and Student Handbook

Document type	General university information and student guidance
Academic year	2026
Document version	1.0 - Testing edition
Publication date	6 November 2026
Intended use	Testing document upload, text extraction and knowledge retrieval

DEMONSTRATION DATA NOTICE

This handbook describes a fictional university created for software development and testing. Northstar University, its departments, programmes, contact details, fees, dates and policies in this document are synthetic. They are not official information and must not be used for real admissions, payments or academic decisions.

This sample is designed to provide varied, structured text for testing a university knowledge management system. It includes institutional information, academic services, admissions guidance, assessment rules, fees, library services and contact details.

1. About the University

Northstar University is a fictional higher education institution established in this demonstration scenario to provide undergraduate education, professional development and student support. The university's stated educational approach combines classroom teaching, practical projects, independent study and supervised assessment.

The institution is represented as having an Administration Building, a Student Services Building, a Library and Learning Centre, and a Computer Centre. These locations are illustrative and do not correspond to a real campus.

Mission and educational approach

The fictional mission of Northstar University is to provide accessible, career-focused education and encourage responsible use of technology, clear communication, critical thinking and lifelong learning. Students are expected to participate actively in their programmes and follow the academic and conduct requirements published by the university.

Academic structure

For this testing handbook, academic activity is organised into faculties and programme teams. Each programme team coordinates module delivery, learning materials, assessment information and academic guidance. The Registrar's Office maintains student registration records, while the Examination Office coordinates examination administration and the publication of results.

2. Academic Programmes and Learning

The demonstration institution offers the following sample study areas:

Study area	Example programme	Typical subjects
Computing	BSc (Hons) Computer Science	Programming, databases, software engineering, networks
Business	BA (Hons) Business Management	Management, accounting, marketing and organisational be
Engineering	BEng (Hons) Software Engineering	Systems design, software architecture, testing and project
Foundation Studies	University Foundation Programme	Academic English, mathematics and study skills

Teaching and learning may include lectures, tutorials, laboratory sessions, group assignments, individual projects and guided independent study. Module leaders are responsible for communicating learning outcomes, assessment methods and recommended reading at the beginning of each module.

3. Admissions and Registration

Prospective students in this fictional scenario are asked to review the programme entry requirements before submitting an application. Typical application information may include identification details, prior academic qualifications, examination results and contact information. Programme-specific requirements may differ.

Application process

The sample admissions process consists of five stages: (1) select a programme, (2) review entry requirements, (3) complete the application form, (4) submit the requested supporting documents, and (5) wait for the Admissions Office to communicate the outcome. An application is not considered complete until the required information has been received.

Registration

An applicant who accepts an offer must complete the registration instructions supplied by the university. Students should keep copies of submitted documents and any official registration confirmation. Changes to personal details should be reported to the relevant student services office.

4. Fees and Payment Guidance

The following figures are invented solely for testing. They do not represent actual tuition fees or payment terms at any real institution.

Item	Illustrative amount	Notes
Annual tuition fee	LKR 450,000	Example amount for a sample undergraduate programme
First instalment	LKR 225,000	Illustrative 50% instalment
Second instalment	LKR 225,000	Illustrative remaining balance
Library deposit	LKR 5,000	Refund conditions would be defined by a separate policy

Students should use only payment instructions confirmed through an official university communication channel. They should retain payment receipts and contact the Finance Office if a payment is not reflected in their student account. This sample document does not provide bank account details or authorise any payment.

5. Assessment and Examination Guidance

Assessment methods may include written examinations, coursework, presentations, laboratory exercises, practical demonstrations and individual or group projects. Each module outline should state the assessment components, submission method, deadlines and marking criteria.

Academic integrity

Students are expected to submit work that represents their own effort and to acknowledge sources appropriately. Plagiarism, unauthorised collaboration, falsification of results and other forms of academic misconduct may be referred for review under the applicable academic regulations. Students who are uncertain about citation or collaboration rules should ask their module leader before submitting work.

Examination administration

Students should check examination timetables and venue details through the official student communication channel. They should arrive in good time and follow instructions issued by examination staff. Requests concerning examination records, result corrections or formal appeals should be directed to the Examination Office using the published procedure.

6. Student Support Services

The fictional university provides a set of student support functions for this example:

Student Affairs: General student guidance, campus-related enquiries and referrals to relevant support teams.

IT Support: Assistance with student portal access, account problems, campus network access and supported university systems.

Library and Learning Centre: Access to study spaces, learning resources, borrowing services and research guidance. Borrowing periods and renewal rules are determined by the library's current procedures.

Admissions Office: Application status, programme entry requirements and offer-related enquiries.

7. University Office Directory

The following contact information is fictional and is included to test document search and question answering. The email addresses use the reserved .example domain and are not real mailboxes.

Office	Telephone	Email	Office hours
General Enquiries	+94 11 200 1000	info@northstar.example	Mon-Fri, 8:00 AM-5:00 PM
Admissions Office	+94 11 200 1001	admissions@northstar.example	Mon-Fri, 8:30 AM-4:30 PM
Student Affairs	+94 11 200 1002	studentaffairs@northstar.example	Mon-Fri, 8:30 AM-4:30 PM
IT Support	+94 11 200 1003	itsupport@northstar.example	Mon-Fri, 8:00 AM-5:00 PM
Finance Office	+94 11 200 1004	finance@northstar.example	Mon-Fri, 8:30 AM-4:30 PM
Examination Office	+94 11 200 1005	examinations@northstar.example	Mon-Fri, 8:30 AM-4:30 PM

8. General Student Questions

Where should a prospective student ask about entry requirements?
Contact the Admissions Office and identify the programme of interest.

Who should be contacted about a payment that is not showing in the student account?
Contact the Finance Office and provide the payment receipt through the university's approved communication process.

Where should a student report a problem with a university account?
Contact IT Support and provide a short description of the issue. Do not send passwords by email or share them with support staff.

Who handles examination timetable and result enquiries?
Contact the Examination Office and include the relevant module or examination details.

Where can a student ask for general campus guidance?
Contact Student Affairs or the General Enquiries desk.

9. Document Review and Information Accuracy

University information can change. Students should consult the latest approved policy, announcement or official communication when information appears inconsistent. Where two documents conflict, the document owner or responsible university office should confirm which version applies.

For a real knowledge management system, each uploaded document should have an owner, a review date, a publication status and, where appropriate, an effective date and expiry date. Superseded policies should be archived so that users are not given outdated guidance.

End of demonstration handbook.

Testing suggestions

After uploading this PDF, try searching for: the annual tuition fee, the Admissions Office telephone number, the office responsible for examination enquiries, the sample academic integrity rules, and the IT Support email address. These questions help test text extraction and retrieval across different sections of the document.
