APIIT Tuition Fees, Payment Options and Admissions

Document Number: 05
Institution: Asia Pacific Institute of Information Technology (APIIT) Sri Lanka
Research Date: November 10, 2026
Description: A comprehensive guide detailing the admissions process, intake periods, and available financial information for prospective students.

1. Tuition Fees and Financial Information

Important Financial Notice: Specific monetary values for tuition fees, registration fees, examination fees, and other compulsory charges are **not publicly available in the reviewed official APIIT sources** [APIIT-015]. Prospective students must contact the APIIT Sri Lanka Admissions Office directly to request an official, up-to-date fee structure for their chosen academic programme and intake year.

While exact figures are not published online, the financial structure for APIIT programmes generally consists of the following components that students should inquire about during the application process:

- **Registration Fees:** A one-time administrative fee required upon acceptance of the offer to secure enrollment.
- **Programme Tuition Fees:** The core instructional costs, which may vary depending on the chosen faculty (Computing, Business, Law, etc.) and the study route (Standard 3-Year vs. Accelerated 2-Year).
- **Awarding University Fees:** Fees payable to the principal academic partner (e.g., University of Staffordshire) for registration, moderation, and final degree awarding.
- **Examination and Assessment Fees:** Charges related to formal assessments and facility utilization.

2. Payment Options and Financial Assistance

2.1 Instalment Plans and Payment Schedules

APIIT Sri Lanka traditionally provides flexible payment arrangements to assist students and parents in managing the cost of higher education. While the exact instalment milestones (e.g., semester-by-semester or monthly breakdowns) are not publicly detailed [APIIT-015], students can typically arrange structured payment plans upon consultation with the APIIT finance division during enrollment.

2.2 Scholarships and Discounts

Specific scholarship criteria, merit-based tuition waivers, or fixed percentage discounts are not broadly published on the main academic portals. Occasionally, APIIT may run promotional campaigns (such as registration fee waivers during official "Open Days" or specific exhibitions). Students seeking financial assistance or high-achiever scholarships are advised to submit their complete GCE A/L transcripts to the admissions team for personalized assessment.

3. Admissions Process

APIIT Sri Lanka employs a structured admissions process designed to assess an applicant's academic readiness and program fit [APIIT-016].

3.1 Application Procedures

1. **Initial Enquiry:** Prospective students are encouraged to contact the admissions team via hotline, email, or by visiting the Colombo or Kandy campuses for initial programme counselling.
2. **Document Submission:** Applicants must submit a completed APIIT application form alongside certified copies of their academic qualifications (O/L and A/L certificates), birth certificate, and National Identity Card (NIC) or Passport.
3. **Admission Assessment:** The admissions committee reviews the application against the specific academic and English language entry requirements of the chosen programme.
4. **Offer and Acceptance:** Successful candidates receive an official offer letter. To finalize enrollment, the student must sign the acceptance forms and process the initial registration fees.

3.2 Intakes and Deadlines

APIIT operates multiple intake periods throughout the academic year to accommodate different examination cycles (such as local Sri Lankan A/Ls and London A/Ls). The primary intakes generally occur in:

- **January / February Intake:** Typically aligning with the release of the previous year's GCE A/L examination results.
- **September / October Intake:** Aligning with the traditional UK university academic calendar.

Specific application deadlines vary by intake and programme capacity. Prospective students are strongly encouraged to apply as early as possible, especially if waiting on pending examination results, as conditional offers may be issued [APIIT-016].
