APIIT Computing and Technology Programmes

Document Number: 02
Institution: Asia Pacific Institute of Information Technology (APIIT) Sri Lanka
Research Date: November 10, 2026
Description: A comprehensive overview of all computing and technology academic programmes, including undergraduate, postgraduate, and foundation pathways.

1. Introduction to Computing at APIIT

The Computing faculty at APIIT Sri Lanka delivers programmes awarded by Staffordshire University, UK. The curriculum incorporates cutting-edge technologies and emergent industry practices. Degrees generally offer flexible study durations and incorporate a one-year industry placement to bridge theory and practical application [APIIT-001].

2. Undergraduate Computing Programmes

2.1 BSc (Hons) Computer Science

Qualification Awarded: BSc (Hons) Computer Science

Awarding Institution: University of Staffordshire, UK

Campus Availability: Colombo | Kandy

Programme Overview: Puts students at the forefront of cutting-edge technologies by combining computer science theory with specialist learning and real-world experience [APIIT-001].

Structure and Duration: Four years (including an up to 1-year industry placement in Year 3). Intake occurs in Jan-Feb.

- **Year 1:** Computer Architecture & Operating Systems Design, Algorithms & Programming Concepts, Networks & Communications, Software Development, Data and Distributed Systems, Cloud & Cyber.
- **Year 2:** Professional Practice & Project Management, Cloud Infrastructure & Design, Data Analytics, Hardware, Micro-Controllers and Sensors, Interface Design and UX, Optional Module.
- **Year 3:** Industry Placement up to 1 Year.
- **Year 4:** Dissertation, Negotiated Studies, Data Science and Databases, Computer Graphics, Optional Module.

Admission Requirements: Standard Route requires 3 passes at GCE A/L (Sri Lankan) or 3 D passes (London/Cambridge/Edexcel), OR the APIIT Degree Foundation, plus O/L Credit passes for English and Mathematics. An Accelerated Route (3 C passes at A/L) is also available [APIIT-001].

Career Opportunities: Roles such as Associate Software Engineer, Academic/Research Opportunities, Application Developer, Web Engineer, leading to Technical Lead and Software Architect.

2.2 BEng (Hons) Software Engineering

Qualification Awarded: BEng (Hons) Software Engineering

Awarding Institution: University of Staffordshire, UK

Campus Availability: Colombo | Kandy

Programme Overview: Designed to train students to develop high-quality software systems ranging from smart phone applications to modern enterprise applications [APIIT-003].

Structure and Duration: Four years (with 1-year industry placement), 3 years (without placement), or 2 years via the Accelerated path (no placement offered).

- **Year 1:** Architecture & OS Design, Algorithms & Programming Concepts, Networks & Communications, Software Development, Data & Distributed Systems, Cloud & Cyber.
- **Year 2:** Professional Practice, Interface Design and UX, Advanced Programming, Web Development, Mobile Application Development, Cloud Infrastructure & Design.
- **Year 3:** Industry Placement up to 1 Year.
- **Year 4:** Dissertation, Software Development and AI, Clean Coding, Developing with Frameworks, Optional Module.

Admission Requirements: Same standard (3 S passes / 3 D passes) and accelerated (3 C passes) A/L entry requirements as Computer Science. O/L English and Mathematics Credits are mandatory [APIIT-003].

2.3 BSc (Hons) Artificial Intelligence

Qualification Awarded: BSc (Hons) Artificial Intelligence

Awarding Institution: University of Staffordshire, UK

Campus Availability: Colombo

Programme Overview: Equips students with cutting-edge skills in Machine Learning, Data Analytics, Data Science, Computer Vision, and Natural Language Processing [APIIT-002].

Structure and Duration: Standard 3-year academic study plus up to 1-year industry placement.

- **Year 1:** Architecture & OS, Algorithms, Networks, Applications of AI, Data & Distributed Systems, Cloud & Cyber.
- **Year 2:** Professional Practice, AI, Data Structures and Algorithms, Data Analytics, Advanced Machine Learning, Problem Solving using OOP.
- **Year 3:** Industry Placement up to 1 Year.
- **Year 4:** Advance Data Science, Computer Vision, NLP, Negotiated Studies, Dissertation.

Admission Requirements: GCE A/L 3 passes in either Mathematics or Bio-Science streams (Sri Lankan) or 3 D passes in Maths/Physics/IT-related subjects (London). O/L English and Maths Credits are required [APIIT-002].

2.4 Other Undergraduate Degrees

In addition to the above, APIIT Sri Lanka officially lists the following specialized computing undergraduate programmes [APIIT-004]:

- **BSc (Hons) Cloud and Network Computing:** Empowers students to become leaders in designing, implementing, and managing modern network infrastructures and cloud platforms.
- **BSc (Hons) Cyber Security:** Designed to prepare students for the evolving challenges of today's digital landscape, focusing on securing data, systems, and networks.

Note: Specific modular breakdowns and durations for Cloud & Network Computing and Cyber Security are not publicly available in the reviewed high-level sources. Prospective students should contact APIIT Sri Lanka for confirmation.

3. Postgraduate Computing Programmes

APIIT Sri Lanka offers several advanced master's programmes awarded by Staffordshire University, UK, aimed at graduates and professionals seeking advanced specialization [APIIT-005].

- **MSc Computer Science:** A graduate-level master's programme providing advanced knowledge in computing systems and modern technologies.
- **MSc Software Engineering:** Focuses on advanced knowledge and skills required for professional software engineering and project management.
- **MSc Information Technology Management:** Enables students to develop evaluative approaches to theoretical knowledge and enhance practical management of IT infrastructures.
- **MSc Cyber Security:** Focuses on high-level enterprise security, digital forensics, and threat management.
- **MSc Computer Science (Business Computing):** Provides a vital bridge between technology and management by developing core knowledge in business-oriented computing systems.

Note: Complete entry criteria, module lists, and tuition details for postgraduate programmes were not comprehensively published in the reviewed directory sources. Prospective students should contact APIIT Sri Lanka for confirmation.

4. Computing Foundation Programme

Qualification Awarded: APIIT Computing Foundation

Approved By: University of Staffordshire, UK

Programme Overview: The Computing Foundation programme introduces students to the fundamentals of computing while strengthening analytical, numeracy, digital literacy, and programming skills [APIIT-006]. It serves as a direct pathway for students who do not meet the direct A/L entry requirements for the BSc/BEng undergraduate programmes.

Academic Experience: Students are assessed via coursework and examinations, developing the independent learning skills required for successful transition into the Staffordshire University degree pathways.
